Attention

Before using the device we strongly recommend reading this user manual first.

Do not rip open the device. Do not touch the device if the device block is broken.

All wireless devices for data transferring may be susceptible to interference, which could affect performance.

The device is not water-resistant. Keep it dry.

Device is powered by low voltage +9V DC power adapter.

Please do not scratch the device. Scratched device is not fully protected.

Safety information

The RUT850 router must be used in compliance with any and all applicable national and international laws and with any special restrictions regulating the utilization of the communication module in prescribed applications and environments.

You have to be familiar with the safety requirements before using the device!

Specifications	
Software	RUT850_R_XX.XX.XXX
Frequency bands*	EEE802,11b/g/n 2400 MHz, GSM/3G/4G, UMTS/HSPA+
Max. RF power	20 dBm@WiFi, 33 dBm@GSM/GPRS/EDGE, 24 dBm@LTE/WSDMA
Representative accessories specifications	
Power	AC/DC power adapter 9 V 1 A, or Cigarette plug socket, or 12/24 V battery, 4 pin plug
GSM/WCDMA/LTE antenna	703-960/1710-1990/2110-2170/2500-2690 MHz, 50 Ω , VSWR \leq 2, gain** 1 dBi, omnidirectional, vertical polarization, Fakra-D plug
GPS antenna	1561-1615 MHz, DC 3.3 V, VSWR \leq 2, active total gain** 18dBi (typ.), linear polarization, Fakra-C plug

* Supported frequency bands are dependent on geographical location and may not be available in all markets.

** If an extension cable is used to attach the antenna, the antenna gain may be higher by the amount of cable attenuation. The user is responsible for the compliance with the legal regulations.

This sign on the package means that it is necessary to read the Users Manual before you start using the device.

This sign on the package means that all used electronic and electric equipment should not be mixed with general household waste.

To avoid burning and voltage caused traumas, of the personnel working with the device, please follow these safety requirements:

The device is intended for supply from a Limited Power Source (LPS) that power consumption should not exceed 15VA and current rating of over current protective device should not exceed 2A.

The highest transient over voltage in the output (secondary circuit) of used PSU shall not exceed 36V peak.

The device can be used with the Personal Computer (first safety class) or Notebook (second safety class). Associated equipment: PSU (power supply unit) (LPS) and personal computer (PC) shall comply with the requirements of standard EN 60950-1.

Do not mount or service the device during a thunderstorm.

To avoid mechanical damages to the device it is recommended to transport it packed in a damage-proof pack.

Protection in primary circuits of associated PC and PSU (LPS) against short circuits and earth faults of associated PC shall be provided as part of the building installation.

To avoid mechanical damage to the device it is recommended to transport it packed in a damage-proof pack. When using the device it should be placed so that its indicating LEDs would be visible as they inform in which working mode the device is in and if it has any working problems.

Protection against over current, short circuiting and earth faults should be provided as a part of the building installation.

Signal level of the device depends on the environment in which it is working in. In case the device starts working insufficiently, please refer to qualified personnel in order to repair this product. We recommend forwarding it to a repair center or the manufacturer. There are no exchangeable parts inside the device.

Introduction

Thank you for purchasing a RUT850 automotive LTE router! RUT850 is a compact mobile router with a high speed wireless connection.

This router is ideal for people who'd like to share their internet on the go or in a vehicle, as it is not restricted by a cumbersome cable connection.

For in-depth information on how to use and configure a RUT850 router, visit our wiki page: <http://wiki.teltonika.lt/index.php?title=RUT850>

Hardware installation

1. Push the SIM holder with the SIM needle.
2. Pull out the SIM holder
3. Insert your SIM card into the SIM holder
4. Slide the SIM holder back into the router.

5. Attach LTE and GPS antennas.
6. Connect the power adapter to the socket on the back of the device. Then plug the other end of the power adapter into the power socket.
7. Connect to the device wirelessly (SSID: RUT850_001E42 ***** (unique to each device)).
